

PRECISION KART EQUIPMENT

Congratulations on your purchase of the Italsport Carbie Test Gauge.

The Italsport Carbie Test Gauge has been designed and assembled in Australia from the best products available on the market. During assembly your gauge has been tested for accuracy and function however from time to time your gauge may need the following maintenance.

- 1/ Check the valve pin in the gauge body blocking valve is elevated, free from foreign matter and sealing. Use care as the valve pin is fragile.
- 2/ Check Plunger O Ring & Gauge Body O Ring are in good condition and free of foreign matter.

ALSO AVAILABLE CARB TESTING BRACKET

The carbie testing bracket fits all Tillotson style carburettors. This bracket allows you to test and adjust the carburettor while it is disassembled. The unit also fits neatly in your test gauge box.
